

2020/12/9

2020 progress and 2021 Planning Meeting was held online

We held an online Zoom Meeting for explanations on the progress in 2020 and the plans for 2021, and for a seminar "the latest aquaculture technology in the target species" at the same time. The seminar presentation materials were shared by the members. In addition, we exchanged each opinion on the possibility of holding a face-to-face project general meeting next year.
